

AI IN THE WORKPLACE

APPLICATION OF AI (30 MINUTES)

AGENDA

Introduction

Use cases

Final tips & takeaways

Questions

INTRODUCTION

- What's going on at KCC with AI (current struggle[s])
 - Policy, interest vs adoption, application
- We are still in the age of narrow intelligence with AI. What does that mean?
- Application is key but with caveats

USE CASES

FINAL TIPS & TAKEAWAYS

- We are in the age of narrow intelligence. The AI tools/agents you are exposed to are pattern recognition systems and are not self-aware
- Agent/workflow reliability is **STILL INCONSISTENT**. Results should still be verified, especially in multi-step queries/conversations
- For publicly available tools, **NEVER** input confidential or sensitive information.
- **EXPLORE** The landscape of AI is evolving at pace that is changing daily. Work with your IT departments to discuss AI technologies that can assist with improving the operational practices of the college
